

Our Story

Camera Mouse is a free program from Boston College that allows you to control the mouse pointer on a Windows computer just by moving your head.

The program was developed to help people with disabilities use the computer. The main audience for this program is people who do not have reliable control of a hand but who can move their head. People with Cerebral Palsy, Spinal Muscular Atrophy, ALS, Stroke, TBI, Multiple Sclerosis, various neurological disorders use this program to run all types of computer software, including education programs, communication programs and web browsers.

All that is needed to use Camera Mouse is a Windows computer and a webcam. Camera Mouse is available for free download.

Testimonials

"Thank you so much for Camera Mouse. Having ALS and not being able to move my arms, Camera Mouse has changed my life."

- United States

"a valuable resource, not just for education but also for communication, enabling children with severe special needs to communicate, in some cases for the first time, with others and with their peers."

- Minister for Education of Northern Ireland

"I have found your fantastic program ... I am nearing 50 and I have found out that I have a degenerative condition.... What I am finding is that the program works very well; I am using my daughter's ASUS lap top with built in camera... I thank you and your team for your outstanding work."

- Australia

"Camera Mouse is truly wonderful and the fact that there are no costs involved is hugely beneficial to so many."

- South Africa

Camera Mouse helps people with disabilities access the computer

Camera Mouse Changes Lives

Camera Mouse is a program that enables people with significant disabilities to use the computer and communicate using limited head movement.

Camera Mouse essentially replaces the mouse so it can be used with all types of application programs and websites.

The program is very easy to learn. To use Camera Mouse all you need is a Windows computer and a webcam. The Camera Mouse program is available for free download at www.cameramouse.org.

Frequently asked questions (FAQ's)

Who can benefit from Camera Mouse?

Camera Mouse is intended for people with physical disabilities, people who cannot move their hands to control a mouse or speak to a voice recognition program. To use Camera Mouse a person needs to be able to control the movement of his head.

Is this really free? How?

Camera Mouse is available for free download. Camera Mouse is part of our mission of education, research, and service. Over a thousand copies of Camera Mouse are downloaded each day. We would like to help as many people as possible.

Support for our work comes from the Philanthropy Committee of Mitsubishi Electronic Research Labs (MERL) and the Mitsubishi Electric America Foundation. Major continuing support for Camera Mouse comes from Boston College.

How do I install and use this program?

Simply go to www.cameramouse.org to download the program. Installation and operation of the program are quite straight-forward, but a full user manual is available at the website.

What types of user training are available?

If you would like onsite training, please contact Sarah Parker of the Boston College Campus School at 617-552-8214 or parkersn@bc.edu; or Debbie Inkley of the Opportunity Foundation of America at 801-231-6691 or debbieinkley@foa.net.
